

INFORMATION FOR DISTRIBUTORS

AUGUST 2014

Dear friends,

Our sales department and store is moved to new location, and although it is not yet fully in accord in all processes, our customer service runs well and shipments leave our store with usual timing. Our contact e-mail addresses are still these old ones, the postal address of the store is Belehradská 3344/1, 43401 MOST. The store is located in City of Most downtown besides the SHD-KOMES building, which is the tallest building in the city, well seen from most other locations in the city and, frankly speaking, also from the countryside. The GPS location is 50°30'23,8"N 13°38'34,2"E, for whom would like to come. The phone line is +420 723 868 928, for the customer service you may contact Petra Pavlickova on +420 734 155 677 or Martin Finger on +420 776 259 377. Concerning subcontracts, contact Martin Sulc on subdodavky@eduard.cz or on martin.sulc@eduard.cz, or on his cell phone +420 734 254 959. The July releases are ready for dispatching, except R0009 Bf 109G-6 Royal Class, where one component is not yet delivered, and it is scheduled to be in our store on June 20th. It is expected these items will be available on Monday, June 23, and all deliveries based on the orders received this week (Week 25) could be dispatched during week 26. So please don't hesitate to send your restock orders! R0009 is our leader July release, we expect good sales despite of various internet flames and discussions around real or potential errors of the kit. There is another item in the shadow of the R0009, the Weekend edition of the 1/72nd scale MiG-15bis, item 7424. This item is very important for the future, as it brings a significant change to our approach to 1/72nd scale kit releases. Our 1/72nd scale kits are still not so good sellers like 1/48th scale ones. It could be because 1/48th scale Profipack kits have very

reasonable and competitive price comparable with the similar kits of the other manufacturers, having also great equipment thanks to mask, high quality decals and photoetch detail sets included. It makes very good mix to take such kit like an interesting offer, a good purchase with great value/price ratio. Unfortunately, the 1/72nd scale kits with the equal equipment get much higher price than the average price of the competitor's products, and they fall to the luxury goods category, with less interesting value/price ratio. To change that situation, we decided to modify our Weekend line, to have more eye-catching box design, more interesting decal options, they will be two from the next Weekend kit (MiG-15bis has still one only), and we will add the SuperFabric seatbelts, as a bonus. The price will be kept on the Weekend level, which means USD 16,95 retail, and maybe we will go even down with the future releases. The Weekend edition kits will be released prior of the Profipack in 1/72nd scale line in the future, and we will see quite soon if this could be successful, as we have three new 1/72nd scale project in the progress. This approach is to be part of our future Great Seventysecond Revolution, which will start in the Winter. However, the revolutions are prepared to be hidden and surprising when flaming, so I can't tell you more right now.

The next Weekend release to be released in the new concept has to be MiG-21R in August, with two marking option already. We release four new kits in August, except this MiG-21R also F6F-3 Hellcat and Fw 190A Nightfighter in 1/48th scale Profipack line. Fw 190A Nightfighter contains the alternative parts for three variants, A-6/R-11, A-7/R-11 and A8/R-11, however, the single kit will be buildable only and at least one set of the fuselage and wing will remain after building of the kit. To give chance to the modeler to complete the second set of the plastic frames, we will offer

the frames with the small parts as a separate product in our Overtrees line, available by our web store. If you or your customers will want these frames, just contact our sales department for the offer. The fourth kit release of the July is 1/144 Ju 87B in Super44 Dual Combo line.

We bring wide list of new after market products as usual. Check the photoetch first, with the collection of two sets for 1/35th scale Nashorn by Tamiya and four 1/48th sets for Tornado by Revell. There are two collections of the sets for the ships, first three sets for USS Missouri in 1/200 by Trumpeter, and two sets for SMS Emden in 1/350 by Revell. There are some aircraft sets with a relation to the Navy, like the five new sets for 1/72nd scale Sunderland Mk.III by Italeri, or two and two sets for A-6A in 1/48th scale by Hobby Boss as well as in the 1/32nd scale by Trumpeter. The BigEd sets are four in July, with D9R Dooby bulldozer in 1/35th scale. Note the BigEd sets are bringing more than 20% of our sales in photoetch category. Also, see three new 1/72nd scale sets of the SuperFabric seatbelts, for Luftwaffe, RAF and USAAF/USN WWII aircraft. There are also interesting mask sets, for Tornado by Revell or Sunderland by Italeri, or even T-2 Buckeye by MPM/Special Hobby. Also, don't forgot the Brassin, with nine mostly smaller sets for typically wheels or a weapon. Also two new BigSin sets are created using the weapon sets.

I wish you a splendid time with Eduard news today and great sales in the hot Summer!

Vladimir Sulc
