

INFORMATION FOR DISTRIBUTORS

JANUARY 2016

Dear friends,

Just six weeks remain to the end of this year so we are in the moment when we have to introduce you Eduard new releases prepared for January 2016. Our effort was targeted to get the best possible, impressive list of the new, as usual.

The plastic kits first. A good kits selection is always base for good monthly sales figure, and a good marking selection for each kit is base for good sales of each kit. A colorful aircraft with eyecatching marking or even a nose art is simply the best, and you can see we follow this philosophy really seriously. It's true the Avia B-534 of the 3rd series (1/72nd scale, Profipack) makes this duty complicated, but we created an interesting mix finally. Bf 108 in 1/48th scale Profipack edition brings four new highly interesting markings never saw in previous editions of the Bf 108 Taifun.

SBD-5 in 1/48th LIMITED EDITION pack seems to be extremely colorful with two US markings in two patterns, one USAAF A-24 marking, one French and one New Zeelander. The kit contains ex-Accurate Miniatures plastic, photoetch, mask and Brassin (rear machine gun and wheels), decal sheet is printed by Cartograf. This the only Cartograf decals equipped kit in January 2016 kit collection, the other three kit items contain Eduard decals, including 1/48th scale Weekend edition P-400 Airacobra Air-a-Cuttie. We bring also an alternative marking in the decal option, for the customers who can find this attractive marking too complicated or eventually too sexist. So or so, the combination of the attractive marking and Weekend price should work more than well.

Talking about Dauntless, there is a significant detail, calling for photoetch, famous perforated dual purposed air brakes/landing flaps. These flaps remain in plastic only in the kit. But there are two photoetch items in the PE line figure, 48869 Dauntless Upgrade set, and 48870 Dauntless Landing flaps. We release the landing flaps set for P-39 Airacobra too, actually two Airacobra landing flaps sets, the first one for our 1/48th scale kit, the other one for 1/32nd scale Kitty Hawk kit. There are six sets for Kitty Hawk P-39Q/N together in the January news figure. You can also find the sets for Bronco 1/35th scale Horsa glider under 1/32nd scale line numbers. To be back in 1/48th scale, check the PE sets and mask for new beautiful Pe-2 by Zvezda, and see the set for Eduard/Revell SPAD XIII. The 1/72nd scale PE sets line brings three sets for Airfix Shackleton MR.2, single set for Ju 87B (Airfix too) and MiG-29 by Trumpeter. There are Zoom sets and Mask sets for each of these three kits available as well. The ship line brings two sets for German Z-32 destroyer in 1/350 scale, and also single set for Royal Navy X-craft submarine in 1/35th scale. Note this 1/35scale set is numbered in 53 ship line. Concerning BRASSIN line, the list contains eight smaller sets, most of them are various weapon sets, except two Airacobra wheels sets in 1/48th scale designed for Eduard kit. The only large Brassin set for January is the BigSin Spitfire Mk.XVI set. The Photoetch BigEd sets are five, as usual.

The dispatching of the December deliveries is usually more complicated than in the other months every year because the Christmas and New year holiday. We will stop the delivery on Wednesday, December 23rd this year, and we will open again between January 4th and January 7th, 2016, depends when the inventory figure will be finally finished. All January 2016 releases are expected to be available in our store on December 15th, please note the orders received after December 20th, 2015, will be dispatched in early January 2016.

The December 2015 releases are ready in our store today for dispatching. Please complete your restock orders and place them, if they weren't yet sent. Thank you very much for your kind cooperation, and we wish you good Christmas sales

Vladimir Šulc, CEO
