INFORMATION FOR DISTRIBUTORS

MARCH 2016

Dear friends,

welcome to enjoy the first distributors leaflet of the New Year 2016. Once again, thank you for your kind cooperation in past year. We all here in Eduard wish a lot of happiness and a great business in New Year 2016. Let´s do have at least so good year like the past one. However, a better one could be even better. It´s my pleasure to say, that our information and distribution system, including this newsletter, works well and reliable already two years. We thank you for your trust in this system, for your cooperativity and participation. Maybe you still remember the time in the Nurnberg Toy Fair two years ago, when we have introduced our idea how we want to work in future, and also on the diffidence something that could anytime regularly work. See, it works, it works well, bringing general satisfaction. I wish all of us to keep this process alive, having always enough new releases to fill the monthly offer and bring good stuff to all our customers. Just few days remain to the opening of the Nurnberg Toy Fair 2016, with our participation, of course. You can find us on traditional position in Hall 7, booth B73. If you still don´t have an appointment schedule with our staff, please contact you partners on our side asap, Martin Finger or Petra Pavlickova for regular business, or Martin Ferkl for subcontracts. Also, we organize a press conference in OSS Ost, as well as in past year. The press conference begins in 14:00, January 29, 2016, in second floor of OSS Ost, in room Budapest, and will be dedicated to introduction of the kit new releases for 2016. Press conference officially ends on 15:00, the rooms will be closed on 16:00, but there is chance to continue in discussion in the upper lobby or in our booth latter. If you don´t attend the fair, we can send you our presentation by e-mail.

Let´s check the new releases list for March, 2016 now. In the PE and mask sets collection, you can find plenty of new items designed for fresh releases of the other manufacturers, as well as the items designed for our own releases, like the Zoom SS 549 designed for our 1/72nd scale Fw 190A-8 released in Weekend edition, and the set No. 48 878 Rockin´ Rhino, designed for our Limited Edition kit 1143 Rockin´ Rhino, which is F-4J Phantom II (ex-Academy) to be released in February. It is expectable this kit could be one of our big stars this year, and the set continues to upgrade the PE set included in the kit. About the other sets, the top star could be the set for M4A3E8 Sherman Easy Eight designed for new and fresh Tamiya 1/35th scale kit. There are two ship sets, two and probably final sets for USS Texas in 1/350. Three 1/32nd scale Kingfisher sets do have a relation to the battleship, at least in historical context, and they are actually in the design process right now, as the kit was delivered to our company week ago. Three sets are available also for the new Italeri Mirage IIIC in the same scale. In quarter scale, see the Su-25K set for Smer kit, which is old OEZ Letohrad kit. This is important and special one, because the Su-25K set was the first Eduard product introduced 26 years ago, in 1990, the new set is already third PE release designed for this kit. No one PE set else does have three remakes. The others 1/48th scale releases are Tornado GR.4 sets for Revell kit, and Skywarior EKA-3 for Trumpeter kit. I-153 by ICM in 1/48th scale is my personal favorite, even I saw extremely raptorous Russian review couple of days ago. Maybe there are some marginal faults or so, but I see beautiful kit, and also beautiful PE set, which confirms that to design a nice set for a nice kit is easy. See also Gladiator set for Merit kit in 1/48th scale, and two new sets in 1/72nd scale, Apache AH-64D Block II for Academy kit and Su-33 for Trumpeter. And, of course, check four new BigEd sets too. Concerning the Brassin production, we are preparing ten sets together, I see the most interesting two sets designed for Fw 190A-5, the cockpit set and WGr.21 rocket set, which is usable for newly released Fw 190A-8 in Weekend edition too. There are three kit releases this month, the mentioned Fw 190A-8 is the single Weekend release, with standard two marking options, which are maybe two only, but maybe also two most colorful markings available for this version, which is actually the early production sample, with so called standard wing, which is the wing with four MG 131/20 cal.20 mm cannons, without the square bubble over the outside cannons on the upper side of the wings. Next kit is the 1/144 Avia B-534 late series Quattro Combo kit, with five markings for standard B-534 4th production series, there are two kits in the packing available, one marking for unarmed B-534 used in air race in Zurich in 1937, and two markings for Bk-534, which s the late version armed by engine cannon and two machine guns, with different fuselage as well as upper wing. The third and final March kit release is the Limited Edition 1140 LEGION CONDOR kit, which is a kit in Dual Combo mode, with one Bf 109E-3 with alternative E-1 wing in the packing, and one He 51 (ex-Roden). Marking options are eight, three for Bf 109E-3, one for Bf 109E-1, four for He 51, all for the German Legion Condor serving in Spain during Spanish Civil War. This kit is in relation to the I-16 in Spanish service kit released couple of years ago, which is seen in the box design. That´s all. A Profipack release is missing for March, which will be compensated month later, in April, by a Bighit. New Bf 109G-6 in 1/48th scale is coming in April, but if you want know more, come to Nurnberg.

Well, that´s it. The March releases will be available on February 15th, 2016. Please complete your pre-orders to be ready to send them to Martin until February 1st, 2016. The February releases are available today and they are ready to be dispatched. Please complete your restock orders and deliver them to Martin too. Thank you very much! See you in Nurnberg!

Vladimir Sulc
