Dear Friends,

Welcome to today’s newsletter, dedicated to the new releases of our company for the month of May. I hope that it provides you with a bit of a distraction, towards something, for us modellers, more pleasing and closer to our hearts.

First off, I would like to come back to our virtual contest, the Quarantine Bunny Cup. It enjoyed quite a bit more success than we had anticipated, but it also proved to be more labour intensive than expected, and it indicated that time, in the middle of a pandemic induced quarantine, runs somehow differently from normal time. We received an almost endless supply of comments and suggestions, the vast majority of which were positive and helpful. In terms of objections, there were two that were a recurring theme. The first concerned the significance of photographic skills in the results, and the author’s ability to manipulate Photoshop. This objection is completely relevant, and has a simple answer - yes, that’s true. If this type of event is to continue, it would be necessary to compete with decent photography equipment capable of taking quality photographs. Your chances of success will be decreased by snapping a pic with your cell on the kitchen counter, even if you build a model that the modelling gods would be impressed by. I am fairly convinced that modifying a model to any great extent in Photoshop would be counterproductive. I just don’t think that a poorly built model can be changed to the point where it would be made that much better. But good photographic skills will certainly be needed. The winners in such contests will be well photographed well built models. You can like it or complain about it, but come up with something better, because otherwise, that’s how it will stay.

The other objection is a little tougher to deal with. In the first contest, we depended solely on the number of ‘likes’ to determine the winners. It appears that some of those who entered intensively dedicated their time to the accumulation of ‘likes’. Originally, I assumed that this would not be an issue. I figured that modellers would ask their buddies for ‘likes’, and that they would check out the contest on the web, and the contest would get more hits that way. To top it off, they wouldn’t just be limited to liking their friends’ entry. They could lend their support to other entries, as well. It’s a good thought. Unfortunately, it appears that we are on the naive side, in terms of users of Facebook. The reality of this situation, turns out, is more complicated than that. We’re not talking only about tolerable requests for support here. We looked into this, and we strongly suspect that there was some barters going on in the quest for more likes, and that some may have even been paid for in some way. That would be something that I cannot put under the category of competing fairly. It smacks of doping, and other unethical practices in high level sports. It’s also not something that we will support, and for that reason, the next such event, planned for June, will be built on the basis of a judging commission.

In April, the modelling world was rocked by the demise of Wingnut Wings. WNW is an intriguing tale of huge investment, hope, and well executed work. It also opened up a new segment of the market. That is something that few are able to accomplish in any industry. Come what may out of this whole thing, Wingnut Wings models will not be soon forgotten.

Let’s turn our attention to the new releases for the month of May. We are coming out with five new kits, the most interesting of which appears to be the Bf 108 in 1:32nd scale. This is a ProfiPACK kit. As you are probably well aware, this is a kit who’s development was undertaken by another company, and was never finalized before the moulds were put up for sale. We bought those moulds and are releasing the kit under our own label. We also purchased the boxart for this item. This kit, under the original label and with the original boxart, was introduced and partially advertised before. We are planning to release this kit as per our established practices, meaning that it will first be released as a ProfiPACK kit, then as a Weekend Edition kit, and finally as one, or perhaps more, Limited Edition special boxings. The first, being released this month, is the ProfiPACK version. It follows the standard norm established for the ProfiPACK line, meaning it includes photoetched masks, and five decal options. The kit also includes a resin wood propeller option. The reason that this is rendered in resin is that a wooden prop option was not part of the plastic components, but is relevant to many marking options.

We have two ProfiPACK kits ready for the month of May. The second is a 1:72nd scale Fokker D.VII(Alb), a license produced version built by Albatros. Here, the rendition of the kit also adheres to the established norm, and includes photoetched brass, masks, and a large decal sheet. A section of the decals contains the lozenge patterns, and these are rendered with filters that accent the structure under the fabric and a certain degradation of its colours. I am convinced that this attribute, applied to the decals and first used in February’s Du Doch Nicht!! kit, will be, at the very least, a pleasant character-
ristic of the decals. And speaking of the Du Doch Nicht!! kit, the first pressing sold out very quickly, and the second one was stocked this week. Also stocked with it was the second run of the ProfiPACK Bf 109G-10ErIa.

The next kit to be released this month is the Lysander. This is a 1:48th scale Limited Edition kit, and has its origins in the Gavia kit, and has been released by Eduard several times as both ProfiPACK and Limited Edition models. The kit has certain features that show the age of the model, and these are compensated for by inclusion of photoetched brass and resin details. The relatively large decal sheet offers markings for a mix of British and Finnish Lysanders from varying time periods throughout its career. All of the previous releases of this kit sold out very quickly, and I have no reason to believe that it will be any different with this kit.

We are releasing a Spitfire Mk.VIII in the Weekend line, and both marking options are dedicated to the Royal Australian Air Force. These are attractive schemes, a fact that you can easily confirm for yourself elsewhere in this newsletter. The same can be said for the final kit release of the month, a 1:144th scale MiG-21bis in the now-bagged SUPER44 line. All of the marking options hail from the 1:48th scale version of this airplane, and, simply put, are damn nice, too.

In order to fully take advantage of our printing capacity, we are preparing another three classic type decal sheets, each containing four or five options. Two are dedicated to the Spitfire Mk.VIII, and the third to the P-38F from Tamiya. All of these, being slated for June release, are in 1:48th scale.

As is usual, the majority of new items being released are in the accessory department. These include detail sets, masks, photoetched brass, Brassins, and increasingly, decal sheets. Among the brass accessories, I would like to draw your attention to the two sets for the American aircraft carrier USS Langley, designed for the 1:350th scale Trumpeter kit. The Langley is an amazing ship owing to her historical significance, and this will account for the interest generated by her in the modelling community. We have two new sets in 1:35th, for the T-72A (Trumpeter) and the R35 French Light Tank (Tamiya). For the R35, we also have a mask set. In 1:72nd scale, we have sets for the F-14A (Academy) and the Hurricane Mk.IIc (Arma Hobby), which are kits that have recently been making waves among modellers. Both also have mask sets being produced for them. Masks and Zoom sets are also being produced for the He 162 by Special Hobby. The Zoom set is being released on its own because that little squirt doesn’t offer up much of an opportunity to supply anything else that would go beyond a Zoom etch. The same can be said for the T-33 from Platz. We have also prepared some mask sets for two Skyhawks from the Polish firm Hobby2000. These are repackaged Fujimi A-4M and OA-4M kits. Together with the new MiG-21bis kit in 1:144th, we have designed a newly conceptualised photoetched detail set. In 1:48th scale, I would like to point out the set for Airfix’s Tiger Moth, as well as for their Hunters Mk. F.4 and F.5. There is also a set to go with our new release of the Lysander, the same as for the Modelsvit Bf 109C and Kinetic EA-6B. All three of the latter mentioned kits have ZOOM sets available for them. We have one set in 1:32nd, and it is designed to go with our newly released ProfiPACK Bf 108. It also has a mask set being released for it in the TF style, and this includes interior and exterior canopy framing. May has four new Big Eds coming out. There three decal sheets, too. These cover lozenge pattern fabric of different versions for the Fokker D.VII in 1:72nd scale.

In the Brassin line, we have a cockpit set out for the MiG-21PF, and a separately available SK seat for the same kit in 1:72nd. Please note, the seat is being labelled as 'MiG-21PF Ejection Seat', not as 'SK Seat'. There are three new Look sets, one for the Tornado GR 1 (Revell/Eduard), the P-51D-5 (Airfix) and the Bf 108 in 1:32nd, the kit being released by us this month. Two new LookPlus sets are out for our P-51s, versions D-5 and D-10. For the 1:32nd Bf 108, there are also two new wheel sets, and that resin propeller, representing the wooden unit. As is usual, there are also different weapons sets being released, in different scales. For May, these are AIM-54C Phoenix missiles and AIM-9Xs in 1:32nd, JP233 dispensers in 1:48th, and HVARs in 1:72nd. Once again, there are no new Big Sins for the month, and the reason for this is that the production capacity of the Brassin department is being stretched to the max.

That is it for this month. I wish all of you good health, patience and success in the coming months. Happy modelling!

Vladimir Sulc

LF Mk.IXc, MJ291, flown by F/O Otto Smik, 310. Sqn., Mendlesham Air base, April 1944

648098 Spitfire wheels - 5 spoke (Brassin)
MiG-21MF Interceptor 1/72

built by Fabio Besani
CAMO M
Cat. No. 7453

Product Page
No. 4175, 1st Fighter Regiment, České Budějovice, Czechoslovakia, 1979

Colour additions in red and yellow on the upper wing surfaces and the red band around the fuselage were temporary used during air combat maneuvering exercises on two pairs of aircraft. The rest of the schemes is consistent with factory deliveries from 1975 when it was delivered to the 1st Fighter Regiment. After being upgraded to MiG-21MFN standard during 2000, it was one of the last to serve at Caslav in 2005.
Fw 190A early versions 1/48

built by Pavel Zimandl
CAMO M
Cat. No. R0016

648356 Fw 190A wingroot gun bays (Brassin)
BUILT

**Fw 190A-4/Trop, W. Nr. 145614, EKdo 19, Benghazi, Libya, November 1942**

On July 1st, 1942 Erprobungskommando 19 was formed, whose task it was to evaluate the suitability of the Bf 109 and Fw 190 as a fighter-bomber under tropical conditions. The unit was manned by two instructor/pilots and six pilots that came from Ergänzungsgruppe JG 27 and JG 23. This unit was disbanded after a few months and their assets were distributed among other units.

Aircraft of EKdo 19 carried the so-called desert scheme, composed of RLM78/79, and also carried a white fuselage band with a white ‘E’ on the rudder.

---

**INFO Eduard - May 2020**

**eduard | 49**
Second unit marked as VF-8 was established on June 1st, 1943 under the command of LCdr. William M. Collins Jr. and was dispatched for the operational training aboard USS Intrepid which was sailing in the Caribbean Sea at that time. Tri-color camouflage, introduced as of January 5th, 1943, for the application on the aircraft deployed to Pacific, composed of Non-specular Sea Blue, Semi-gloss Sea Blue, Intermediate Blue and Non-specular White, was applied slightly differently than on the other aircraft. National markings featuring the red outline were introduced as of June 28th, 1943.

More pictures of this model and building article by Mark Neville will be published in Air Modeller No. 90. Late May 2020 release.
