

MARCH 2023

Dear friends,
In today's Leaflet you will find the upcoming releases for March 2023.

THE KITS

In March we will release four new kits as new items and two more that were released earlier and not available for some time.

The biggest hit of the March kits will be probably the Guadalcanal Dual Combo in 1/48 scale in the Limited series. It will include parts for two F4F-4 Wildcat models, an early and a late one. The decals will offer the opportunity to build any of the twelve US Navy and US Marine Corps machines that we have selected from the period of the Guadalcanal fighting, which took place from August 1942 to the middle of the following year. Among them will be the legendary machine with which „Pug“ Southerland fought Saburó Sakai, of course Joe Foss, „Cash“ Register and many others.

In 1/48 scale in ProfiPACK edition we will release Spitfire Mk.Vc TROP. The kit will feature the famous Mk.Vc Spitfires modified for service in the North African dusty environment. The kit will enable to build Spitfires serving in the RAF, SAAF, USAAF and RAAF. The decals will offer the opportunity to build a model of one of six desert Spits from North Africa, Malta, the Pacific and also one Yugoslavian.

In 1/72 scale we will offer two items that focus on the history of the Luftwaffe. The first one will be in the ProfiPACK Bf 109E-4 edition (Special Hobby). The cover will depict one of Adolf Galland's last battles in the late 1940. The kit will offer decals for six aircraft, one of which is from the fighting in France in the spring of 1940, four are documented from the Battle of Britain and one in tropical camouflage was documented at the start of the fighting on the Eastern Front.

The other new addition to the Weekend line will be the Bf 110G-2. For this series we have been offering decals for four machines for some time. This new release will be no exception. The kit will be offer decals to build fighters that flew in Western Europe in 1943, in the Mediterranean, as night fighters on the Eastern Front, or with the 37mm gun mounted under the fuselage in the Defence of the Reich.

In this re-release we will bring back to the range two kits in the ProfiPACK series in 1/48 scale that were not available for some time. This will be the MiG-21bis, which will feature decals for six machines - Bulgarian, Hungarian, Polish, Finnish, Croatian and Indian. The second reissue will be the iconic Avia B.534 Series IV, which will be used to build one of the three pre-war aircraft of the Czechoslovak Air Force, or the Avia that served in 1944 with the Slovak Resistance Air Force.

DECAL SETS

We will release 1/48 scale stencil decals for B-25J (HKM) and first sheet of stencil decals for Su-25 (Zvezda). In this large sheet will be covered the Russian stencils. Similar sets in Czech and Slovak language will follow.

BRASSIN

Most of the new products in the Brassin range have been produced by direct 3D printing for many months now, and March will be no different. It's good to know that sales of Brassin range printed kits conti-

nue to grow, so at the end of last year we installed two more 3D printers to better and more flexibly meet the growing demand.

We will be releasing sets with the engine and landing gear wells for the F4F-4 Wildcat in 1/48 scale (Eduard).

For the 1/48 scale F-35A (Tamiya) kit, we will continue with the undercarriage wheels as well as the LööK set. We will also release an armament set for this kit in the BigSin edition.

We will release landing gear wheels and radiator set for Anson Mk.I (Airfix) in 1/48 scale.

We will produce the machine gun set and LööK set for Beaufort Mk.I kit (ICM) in 1/48 scale.

We have already released several sets for Arma Hobby's P-39Q in 1/72 scale, and we will continue in March with a bomb and an additional tank, including ranks.

We will release a set of ejection seats in 1/48 scale for the F-16 (Kinetic). We will release the handles for the above seats as a separate set, they will be painted on both sides and should save modelers time and trouble.

The 1/48 scale a set of the black cockpit for the Mi-24/35 (Zvezda) will include the 3D Space decals.

We will also release the LööK kit in black color.

In the BigSin edition we will also release the ESSENTIAL set in 1/48 scale for Fw 190A-8 (Eduard) by direct 3D printing. It will include also cockpit and flap parts.

We will continue with in the 1/35 scale sets with generic accessories for WW2 German vehicles. These will be the front notek lights and the shovels.

SPACE

We have eight new products in the Space range. Where appropriate from a modelling point of view, we combine our 3D decals in the Space sets with photo etched parts. In 1/32 scale this will be a set for Hurricane Mk.IIb (Revell). In 1/24 scale we will release set for the Spitfire Mk.IXc (Airfix) and in 1/48 scale we will produce five sets including the F-35A (Tamiya), also one for the new Mi-8MT (Zvezda) and last but not least, Avia B.534 IV. series.

MASKS

I don't usually mention masks in this editorial, but I would like to mention one set in connection with the March items. This is a set of RAM panels, again for the F-35A Tamiya kit. It's an unusually large set, used to mask the outlines of the RAM panels on the surface of JASDF and USAF machines. The set offers a total of eight decal options. A similar, only significantly smaller set of masks for these panels for the remaining seven machines in this Tamiya kit can be found among the February releases just being released. These mask sets are made of a different film than the film used for the canopy mask sets. In addition to its properties that make it more suitable for these surface masks, this material also differs in its black color. With these two items, we return to masks for spraying camouflage fields, emblems and marking details after a long break. We will continue to release similar masks, mainly for our own kits.

Photo-etched parts

The smaller 1/48th scale photo etched sets for the F-35A (Tamiya), which we are now launching as part of the February news block, will be followed up in

March with a large set of photo etched accessories. For the new 1/48 scale B-25J glazed nose kit (HKM) we will release a Zoom set, steelbelts, a large photo etched set and a separate set for the bomb bay.

For Revell's aforementioned new release, the Hurricane Mk.IIb (1/32), we will release the usual photo etched set and landing flaps set.

We are also releasing a photo etched set in March for the new 1/48 scale F-16A MLU (Kinetic). This is a follow up to the sets we released for the F-16C Block 25/42.

For the new Spitfire Mk.IXc in 1/24 scale from Airfix we will release in March steelbelts, a set for the interior and some details for the exterior. We will follow up in April with two more sets that will include details for the engine and gun bays.

For the C-130J kit in 1/72 scale (Zvezda) we will release a series of photo etched sets covering basically the entire model.

Revell has returned to 1/48 scale the B-24D that was originally released in the Monogram production program. We still have two sets for sale, and we will be returning the ones that were discontinued in the past to sale in an updated and revised form. We are still considering a set for the bomb bay.

With the re-release of the Bf 110G-2 (Eduard, 1/72) we will put back on sale both the Zoom set and the larger unpainted set and of course the masks.

Also for the MiG-21bis (Eduard, 1/48), the unpainted updated photo etched set will be on sale.

With the third set of photo etched parts we continue with the accessories for the USS Alaska CB-1 in 1/350 scale kit from Hobby Boss.

Orders and prices

We would welcome your pre-orders for March items by Wednesday, February 1, 2023.

I would like to point out that due to the situation where there is a noticeable drop in sales especially for accessories, we are putting into production volumes consistently based on the total number of pre-orders for each item produced. The quantities that create a reserve for customers without pre-orders are significantly reduced in production and are largely produced only according to the requirements resulting from actual orders. Therefore, if you do not have pre-orders, your new orders may be delayed. This is a situation we have long warned against. In the boom times, this was rarely the case, but the current situation is different and forces us to rationalize our procedures. Thank you for your understanding and cooperation!

February items will be ready for shipping on Wednesday, 18 January.

We are also sending folder with the graphics included in the Leaflet. Many of you are using our Leaflet images for pre-order section of your e-shops and in your newsletters. We hope this will save you some time.

If you would like get more information, clarify some points or if you would need our help, please contact us at department@eduard.cz or contact me directly at jan.bobek@eduard.cz

We look forward to meeting some of you at the Nuremberg Fair.

You will find us in Hall H7A at stand E-14.

Jan Bobek
