

Dear friends,
In today's Leaflet you will find the upcoming releases for April 2023.

THE KITS

In April we will release five new kits as new items and one more that was released earlier and not available for some time.

We can expect the biggest hit among them to be the premiere release of the Rufe kit in the 1/48 Limited Edition. As is customary with premiere kits released in this series, it is packaged in Dual Combo mode with two complete sets of moldings for two models of the Japanese A6M2-N Rufe floatplane fighter. The decals will offer the opportunity to build two of the eight Imperial Japanese Navy machines from the 1942 to 1944 battles of the Aleutians, Guadalcanal, Indonesia and Chichi-jima. Although this floatplane was based on design of the A6M2 Zero carrier fighter, and many customers will probably expect it to be just another boxed version of the Zero, this is not the case. While the kit is also structurally based on the Zero, there is an entirely new set of moulds made for it, and the Rufe shares with the other Zero kits sprues for small parts and clear parts only.

In 1/48 scale in the ProfiPACK edition in April we are releasing Z-326/C-305 Trenér Master. The kit features a version of the famous Czechoslovakian trainer and aerobatic plane, equipped with retractable landing gear. The kit also covers the Z-326M and Z-326MF versions, including the military C-305 variant. The kit can be used to build one of six aircraft from Czechoslovakia, Czech Republic, Hungary, Germany and France.

The ProfiPACK edition in 1/48 scale brings back the twin-engined Bf 110C heavy fighter. The kit is based on previously released plastic parts, however as a new item the kit offers new set of markings.

From the WWII era will be released two 1/48 Weekend Edition kits. The first is the Tempest Mk.V Series 2 with a set of decals allowing to build either one of the three machines operating from Volkel in the Netherlands in the last six months of the war, or a machine without camouflage paint that operated at RAF Wunstorf in West Germany in 1947.

The second kit in the Weekend edition in 1/48 scale is the Fw 190A-4. The technical configuration of the machines in this item's kit is interesting. This is the version equipped with flaps on the engine cooling exhaust and two cannons in the wing root. The decals traditionally offer four variants. Three are fighter-bomber variant machines. One served on the African theatre, another in France, including attacks on Great Britain, and the remaining two machines belonged to the Grunherz Geschwader on the Eastern Front. The fourth machine, which will also be shown in the box art, is a A-4 fighter piloted by Otto Kittel, the Luftwaffe's fourth most successful fighter pilot.

This reissue brings back to the range the long sought after ProfiPACK 1/72 scale kit of the two-seat UTI MiG-15. I hope it will make modelers happy and bring you good business.

BRASSIN

Most of the new products in the Brassin range have been produced by direct 3D printing for many months now, and April will be no different. It's good to know that sales of Brassin range printed kits continue to grow, so at the end of last year we installed two more 3D printers to better and more flexibly meet the growing demand.

For the premiere A6M2-N Rufe in 1/48 scale (Eduard) we are releasing simultaneously a whole range of accessories, based on the sets for A6M2 Type 21. Some publications state that the Rufe did not have folding wingtips. In fact, at least several dozen early production aircraft were equipped with folding wing tips. We also publish the popular LööK set for the Rufe, which

saves modelers time when painting parts and allows easy piece-for-piece replacement.

For the F4F-3 Wildcat in 1/48 scale we will release another set with an engine model, this time for a F4F-3 Late, differing from the earlier set for the F4F-3 Early by the engine cover with two versions of the front ring and some installations underneath.

The Messerschmitt Bf 110E (Eduard) kit in 1/72 scale returns with three sets with an updated design, released under new catalogue numbers. The wheelset is classically cast, as is usually the case with wheelsets. The nose gun set, on the other hand, is printed. The cockpit set is interesting, the base of which has remained cast, but the floor with the gun installation and the rear machine gun are printed. It must be added that these prints are exceptionally fine and detailed.

The 1/48 scale Avro Anson Mk.I kit from Airfix rightly attracts a lot of attention. We follow up the previous sets we have released for it with a quartet of machine guns in April.

For Kinetic's 1/48th scale F-16 kits, we are releasing two printed sets, a radar and an exhaust nozzle. In addition, we are releasing a LööK set for the Block 25 machines. In conjunction with the release of the Limited Edition Mi-24 Eduard kit (plastic parts by Zvezda), we are introducing a cockpit set in turquoise color. This is a follow-up to the black cockpit, which is part March releases. Both sets are being released in a new technological combination of 3D printing and SPACE 3D decal.

The new 1/32 scale Hawker Hurricane Mk.IIb from Revell has attracted a lot of attention. In April we are releasing two printed sets of exhausts and a set of cast landing gear wheels.

With April's new releases, we also return to Tamiya's 1/48 scale Skyraiders. We have prepared an ejection seat, testing modeler interest in seats with integrated seatbelts printed with the seat. It is expected that the modelers will paint these belts. The set does not include the otherwise usual pre-painted photo-etched STEELBELTS.

In the LööKplus range, the new releases include sets for the Bf 109G-4 in 1/32 scale (Revell), the Anson Mk.I (1/48, Airfix) and the P-39Q (1/72, Arma Hobby).

There will be two BigSin sets, an F-14D (1/48, Tamiya) and a weapons set for the Tornado IDS (1/32, Italeri).

Also with two 1/35 scale kits we continue with generic accessories for German WW2 AFVs, this time it will be a lever and wire cutters.

SPACE

We have five new products in the Space range. Where appropriate from a modelling point of view, we combine our 3D decals in the Space sets with photo etched parts. In 1/48 scale we will release sets for F4U-1D (Hobby Boss), A6M2b Zero (Academy), A6M2-N Rufe (Eduard) and in 1/72 scale we will release Space sets for U-2C (Hobby Boss) and UTI MiG-15 (Eduard).

Photo-etched parts

In April we continue with the 1/24 scale photo-etched sets for the Spitfire Mk.IXc from Airfix by adding two items to the pair of sets now released in the March collection.

For the A6M2b Zero in 1/48 scale from Academy, we are releasing a photo-etched landing flaps and a set for cockpit in two colours based on the cockpit colouring of the machines produced by Mitsubishi or Nakajima.

For the 1/48 scale B-24D kit by Revell (ex-Monogram) we are releasing another photo-etched set in April, this time focusing on the bomb bay. The original set is already sold out and we have modified this newly released design to current standards and practices.

The photo-etched sets on the Mi-8MT kit (1/48, Zvezda) are a follow-up to the Space and Mask sets released in March.

In April, we are finally bringing back the photo-etched sets for the 1/48 scale Hellcat (Eduard) versions F5F-3

and F6F-5. The set for Dash 5 is also in a partially upgraded designed.

The previously released set for F4U-1A (1/48, Hobby Boss) is followed by a modified set for Corsair version F4U-1D.

Similarly, the 1/72 set for the U-2A kit by the same manufacturer is the basis for the U-2C kit released in April. For the same month there is planned also a set for the F-14B Tomcat (Academy) in this scale, again based on the already released F-14A set.

For the new SdKfz 251/1 Ausf.C kit (1/35, Academy) we are releasing two sets. The first will also include the 3D SPACE decals with dashboard instruments and the second one will include the opening boxes on the sides of the halftrack. The other new 1/35th scale kit is Takom's M48A5. The set includes, among other things, functional opening crates on the tank's fenders.

Hobby Boss has released a 1/350 scale kit of the battleship USS Missouri (BB-63). In April we will release the first of a planned collection of photo-etched sets for this famous ship.

Orders

We would welcome your pre-orders for April items by Wednesday, March 1, 2023.

I would like to point out that due to the situation where there is a noticeable drop in sales especially for accessories, we are putting into production volumes consistently based on the total number of pre-orders for each item produced. The quantities that create a reserve for customers without pre-orders are significantly reduced in production and are largely produced only according to the requirements resulting from actual orders. Therefore, if you do not have pre-orders, your new orders may be delayed. This is a situation we have long warned against. In the boom times, this was rarely the case, but the current situation is different and forces us to rationalize our procedures. Thank you for your understanding and cooperation!

March items will be ready for shipping on Friday, 17 February.

From March 1, 2023, we will stop dispatching shipments for a period of ten days to two weeks due to the relocation of our warehouse to a new hall. Please expect delays in responding to your emails sent to Petra, department and other usual addresses during the same period. In case of an urgent problem, I recommend contacting me directly by phone, or to my e-mail address.

We expect to receive the last orders before the sales department closes on Friday, 24 February, and ship them on Monday, February 27. Therefore, it is important that we have your orders for March's new releases along with your stock as soon as possible in order to properly ship your orders. We will still inform you of the exact start and end date of the move in a separate email at the end of February.

In the past few days, we have expanded the list of items in **the Sweep sale to include Brassin series sets**. The bulk of these items are older cast sets, with lower sales over the past year. This sale is part of the ongoing renewal of the range. We will be replacing some of these sets with newly designed printed sets in the future. We will send you a list and price list of the items being sold off in a separate email tomorrow. They will again be discounted by 50% and their discount will not be combined with other discounts.

We are also sending folder with the graphics included in the Leaflet. Many of you are using our Leaflet images for pre-order section of your e-shops and in your newsletters. We hope this will save you some time. If you would like get more information, clarify some points or if you would need our help, please contact us at department@eduard.cz or contact me directly at jan.bobek@eduard.cz

Jan Bobek
