

INFORMATION FOR DISTRIBUTORS

DECEMBER 2023

Hello, dear friends,

Allow me to briefly update you on the new developments coming up in December 2023, as well as a few current procedural matters.

THE KITS

The most interesting December new release will be the FM-1 Wildcat in 1/48th scale in the ProfiPACK line. This kit will essentially complete the range of 1/48th scale of the main Wildcat versions in our production. Unlike the other Wildcats, including FM-2, we will not be releasing FM-1 in the LIMITED series. The FM-1 was a licensed version of the Wildcat, based on the F4F-4, produced by the Eastern Aircraft Division factory, which was part of General Motors. The FM-1 were incorporated into the armory of US Navy units deployed primarily on escort carriers and they were also widely used by training units. They also served as the Martlet V in the British Royal Navy. Our plastic kit, like the real aircraft, differs from the F4F-4 version by having a wing armed with four 12.7 mm machine guns, and were capable of carrying a number of variants of armament and equipment on the underwing pods, like unguided rockets, bombs and drop tanks. The decal sheet offers six versions of the color schemes. One of them is an US aircraft from service in the Pacific, two other represent planes deployed in the Atlantic. The fourth US scheme is a plane from training unit, very brightly colored by US Navy standards which was also deployed in combat. The two remaining aircraft are Royal Navy Martlets V. One of these took part in the Normandy landing and the other in the Dragoon operation landing in southern France. The boxart will show a Wildcat from VC-1 unit in Atlantic camouflage, operating from the escort carrier USS Block Island, depicted during the mission in which the German submarine U-220 was sunk.

In December, we will also release a ProfiPACK kit of the P-39N Airacobra in 1/48th scale. The Weekend series will be extended by the Bf 109E-4 in 1/48th scale and the Avia S-199 early version with original Erla canopy in 1/72nd scale. In addition, three items are ready as reissues: the Bell X-1 and the Bf 109 G-4, both in the ProfiPACK series and in 1/48th scale. Last one is Albatros D.V Weekend edition in 1/72nd scale. In addition to these items, we will be re-launching the Bf 110G-4 kit in 1/48th scale in the ProfiPACK series, catalogue number 8208. This is a kit that was a new release planned for January 2021, but during a fire in December 2020, the moldings were lost. Some part of the production made it to market at that time and sold out very quickly. We will release the remaining 850 pieces for sale in December. This is an attractive item, the number of available kits is limited, so I strongly recommend you do not hesitate to order and in any case pre-order for this item. I suspect that without a pre-order the chances of buying this kit will be very

low. In this context I would like to remind you that **we are releasing another older item** in its original packaging now, **the MiG-21PFM in ProfiPACK edition in 1/48th scale, cat. no. 8237**. There are only 310 of these kits available, so it can be assumed that the availability situation will be similar to that of the Bf 110 G-4.

As part of the November block of new releases, Wilder Cat kit (FM-2 Wildcat), cat. no. 11175, and the Kurfürst (Bf 109 K-4) kit, cat. no. 11177, will be back in stock.

BRASSIN

Among the December Brassin sets I would like to mention first a large collection of 1/48th scale items for the FM-1 Wildcat kit. There are eight items in total, including large sets for wheel wells, engine, or folded wings.

Also of interest is the collection of 1/48th scale sets for the Fw 190A-7, the plastic model kit we are launching as part of the November line-up. In December, a cockpit set will be available, as well as an engine with fuselage machine gun installation and a set of bronze landing gear legs.

For the next November release of our plastic kits, the Wunderschöne neue Maschinen pt.2 in 1/72nd scale, the December offer will include sets for the cockpit of the Bf 109G-2 (672342) and for the cockpit of the Bf 109G-4 (672343), a set of the later (larger) landing gear wheels (672341) and a radio installation set that is applicable to all Bf 109s with the DB 605 engine from the G-4 version up to the Bf 109K-4 (672344). In addition, we offer the VDM 9-12087.10 propeller for the Bf 109G with DB 605A engines used on the Bf 109G-2/G-4, and also on the Bf 109G-6 and G-14.

For December we also have prepared a set of wheel wells for the F6F Hellcat in 1/72nd scale, which we have produced based on numerous requests from modelers. It is probably appropriate to add that it is intended for plastic kits of our own production, same applies to the auxiliary tank for the Bf 109K-4 in 1/48th scale. You will probably have noticed that the Brassin series set line-up in December is unique in that, probably for the first time in our history, most of the Brassin accessories released are intended for kits of our own production. It's not the entire production run though, one small set is also designed for another manufacturer's kit, a set of 1/48th scale gun ports for the Hurricane Mk.II by Arma Hobby.

ACCESSORY SETS – PHOTO-ETCHED PARTS, MASK AND DECALS

The situation is different in photo-etched sets, where we mainly service plastic kits produced by other companies. In December, the dominant ones will be sets for helicopter kits. There will be three 1/48th scale cargo interior sets for the new Sea King from Airfix (HAS.1, HAS.5 and HU.5), three 1/48th scale sets for the Mi-17, supplemented by two Zoom series sets,

two mask sets and a SPACE series set, and three etched sets plus two mask sets for the AH-1G 1/35 from ICM.

Another distinctive line-up of photo-etched sets will be intended for Seafire F.XVII in 1/48th scale by Airfix, for which we have prepared two classic etched sets, two sets of Zoom series, two sets of masks and a set of 3D decals SPACE. In addition to these larger sets, which will eventually become BigEd series items, we will also be offering individual sets for other scale models, such as the flaps for the FM-1 Wildcat (Eduard), and for the December releases of our Weekend series, the Bf 109 E-4 (1/48) and Avia S-199 (1/72), we will be offering Zoom series sets, masks and SPACE series sets. These are available for all Eduard plastic kits of all product lines for December. The photo-etched sets will include additional 1/350th scale naval items for the Trumpeter-produced aircraft carrier USS Nimitz. These are the sixth and seventh sets for this large plastic kit. In 1/35th AFV scale we have prepared two new sets for December: one for the Dodge WC-52 (cat. no. 36511) and the other for the BMP-3 (cat. no. 36512), both intended for Zvezda kits.

I would also like to mention two sets of decals for the F-35A kit by Tamiya. One will be available in 1/72nd scale and the other in 1/48th scale.

In addition to the abovementioned sets, BigEd, BigSin and LööK Plus sets are also traditionally offered.

SHIPPING OF NOVEMBER ITEMS

November's new releases are ready for shipping and will be dispatched from October 17. If you have not already done so, please do send in your orders for the November new releases and any restock items.

At the same time, I would like to kindly ask you to send in your pre-orders for the December new releases, preferably by Wednesday, November 1, 2023. It is advisable to meet this deadline, as we are putting the quantities of the December new releases into production based on the status of your pre-orders.

If we do not have your pre-order, we do not guarantee delivery of all items in your future order. Such situations occur especially with LIMITED series items. For example, it has now occurred that we have been unable to fulfil all orders for item cat. no. 11176 HRÁBĚ (Su-25K), which is already sold out. It has only been on offer for three weeks and we are now considering whether to make a second edition.

If you would like to get more information, clarify some points or if you would need our help, please contact us at department@eduard.cz or contact me directly at jan.bobek@eduard.cz

Thank you for your kind attention and support!

Jan Bobek
