INFORMACE PRO DISTRIBUTORY

ČERVEN 2018

Vážení,

jistě si pamatujete představení řady LööK na norimberském veletrhu. Pokud ne a pokud nevíte, o čem je řeč, najdete odpověď v dnešním Newsletteru. Vyobrazení prvních dvou sad nové řady je na následujících stránkách, konkrétně na straně 17. Koncept nové řady využívá komplexu technologií zavedených v Eduardu v posledních měsících a letech. Každá sada řady LööK bude standardně sestávat ze dvou základních komponent: resinové palubní desky a ocelových leptaných upínacích pásů. Obě komponenty budou barvené a palubní deska bude mít zasklené přístroje. Obě základní komponenty mohou samozřejmě sestávat z několika dílů. Palubní deska je konstruována tak, aby ji bylo možno vlepit do modelu bez jakýchkoli úprav jak modelu, tak resinového dílu. Sady řady LööK budeme uvádět prozatím v měřítku 1/32, technologii pro měřítko 1/48 připravujeme, menší měřítka zatím zůstávají mimo technologické možnosti. První dvě dnes představované sady jsou určeny pro P-51D-5 Mustang od Revellu a F4U-1A Corsair od Tamiye, obě jsou v měřítku 1/32.

Organizačně to bude s LööKy tak, že jsou podřadou řady BRASSIN. Doufám, že je to jasné. Když už jsme u Brassinů, dovolím si nasměrovat vaši ctěnou pozornost k několika červnovým zajímavostem této řady. Kupříkladu dvaasedmdesátinový BigSin na Spitfira Mk.VIII se může leckomu hodit k modelu Spitfire Mk.VIII, vydávanému v dubnu, což je stále ještě aktuální žhavá novinka. Dále mezi Brassiny najdete rakety RS-2US a raketové bloky UB-16, oboje v měřítku 1/72, oboje pro MiG-21. Obě sady vydáváme ve dvou provedeních, vždy jedna sada obsahuje i křídelní pylony, jedna se omezuje pouze na zbraň. V tomto stylu budeme sady raket, určené pro MiGy-21, vydávat i nadále. V měřítku 1/32 najdete čtyři sady pro Fw 190A-8 od Revella, včetně rozsáhlé sady či lépe řečeno resinové stavebnice motoru. V 1/48 pokračujeme ve vydávání doplňků pro Bf 109G-6 od Tamiyi, tentokrát je to jedna maličkost, tropický filtr, a k němu kokpit pro verzi G-6/U4, což byly stroje vyzbrojené kanónem ráže 30 mm uloženým v ose motoru. Sada 648405 Bf 109G-6 cockpit 1/48 je určena pro stroje G-6 vyzbrojené kanónem ráže 20 mm. Mimochodem, tuto verzi kokpitu Tamiya ve své stavebnici z nějakého důvodu nemá, byť markingy ve stavebnici jsou vesměs klasické G-6 s 20 mm kanónem. Je to dobré vědět, řekl bych. Třeba se pak budou ty sady lépe prodávat. V měřítku 1/48 máme několik maličkostí na Typhoon Mk.Ib, jde o kola a výfuky.

Tím se dostáváme ke stavebnicím, mezi nimiž je Typhoon Mk.Ib první hvězdou měsíce. Měřítko 1/48, výlisky Hasegawa, doplněné odlitky, maskami, lepty a obtisky od Eduardu, byť obtisky jsou tištěné v Itálii u Cartografu. Odlitky jsou vodorovné ocasní plochy s větší plochou, říká se, že stejné, jako byly u Tempesta, prachový filtr a čtyřlistá vrtule, čímž tedy tento model představuje nejvýkonnější Typhoony posledního výrobního provedení. Odpovídá tomu i výběr markingů, na britské druhoválečné letadlo překvapivě pestrých, což vše dohromady u mě vyvolává očekávání, že toto bude jedna z limitek, které z nabídky zmizí jako pára nad hrncem. Limitky máme v červnu dvě, ve dvaasedmdesátině jsme připravili položku s názvem THE LONGEST DAY, obsahuje dva Spitfiry Mk.IX dvou provedení, C a E, markingy z invaze, včetně slavného pivního Spitfiru. Po čtvrtkové období se svého času také jen zaprášilo, takže to může být podobný případ jako Typhoon. Německou stranu v nabídce zastupuje Profipack Fw 190A-3, poválečná letadla pak L-29 Delfin ve Weekendu, oba jsou v 1/48, a u Delfína lze také očekávat enormní zájem českých a slovenských modelářů, vzhledem k ceně a zvoleným markingům.

Lepty a masky. Mně se nejvíc líbí Fl 282 Kolibri v 1/35, doplňky na něj najdete v řadě leptů v měřítku 1/32. To je ale má osobní preference, obchodně bych čekal větší zájem o jiné položky. Ve zmíněném měřítku 1/35 bych upozornil na tři sady pro Kingtigera od Takomu a dvě pro Centuriona Mk.III od Tamiye. Tamiyi se věnujeme i v leptech na letadla, v měřítku 1/48 jsme provedli revizi sad na Swordfishe Mk.II. Mezi maskami najdete masku na novou Ki-61-Id v 1/72. V měřítku 1/32 jsme oplechovali a omaskovali Tempesta Mk.VI od Special Hobby a Bü 131 od ICM, lepty i masky včetně oboustranné verze TFace najdete i na zmíněného Delfína ve Weekendu. Ve dvaasedmě jsme se důkladně věnovali Blenheimu Mk.IV od Airfixu a F-35B od Hasegawy. To jsou jen položky, které podle mého názoru stojí za důkladnější studium, další najdete v přehledu novinek na dalších stránkách dnešního informačního Newsletteru.

Na závěr ještě tradičně připomenu, že novinky na květen jsou připraveny a pro české a slovenské obchodníky budou uvolněny příští týden ve středu 25. dubna. Díky za spolupráci a váš čas, věnovaný našim novinkám!
